

VEPRO High Pressure Bags 8 bar (116 psi)

- 12 sizes, all only 25 mm (less than an inch) high
- Lifting power from 1,000 to 67,700 kg (2,204 to 149,210 lbs)
- Lifting height up to 52 cm (20.5 in.) – or up to a max. 104 cm (41 in.) with two bags stacked
- Lightweight with aramide
- Lift continuously, noiselessly and jolt-free with compressed air
- Maintenance-free, self-extinguishing material
- Many accessories
- Safety-tested: ISO 9000, official quality-controlled production (TÜV inspectorate)
- Made in Germany

Many different applications

- **For use by fire brigades, rescue services, civil defence, police**
In earthquakes, mines, quarries, traffic accidents, rescue of trapped people and animals, overturned vehicles
- **In industry**
Machine assembly, pipeline maintenance, lifting round tanks, jacking tower cranes, heavy-duty construction machinery repairs, tyre change on low-loaders, buses or trucks, tipping loads, quarrying out marble or rock, installation in machines e.g. to cushion vibrations
- **Mining**
Moving machines, re-railing mine locomotives
- **Military**
- **Airports**

The compact power bags do their job even on round tanks: Placed alongside, they do the initial lifting for subsequent raising, recovery or transport.
